Agenda

- Background on the Louisiana Watershed Initiative
- CDBG-MIT funds and federal rules
- Draft Action Plan
- Feedback and input
- Next steps
Background on the Louisiana Watershed Initiative
Context

• Louisiana’s landscape is **very flat**, has many **water** bodies, and receives a lot of **rain**—the sources of our floods are **complex**.

• Our flood risk is **changing**—places are flooding now that have never flooded before.

• Flood risk is **interconnected**—where the rain falls is not necessarily where flooding will occur.

• We must understand and address how **actions taken in one community** can impact regional flood risk.
Louisiana’s approach to addressing flood risk relies on several key elements

• Better data and modeling capabilities.
• Investments in evidence-based flood control projects.
• Greater coordination at all levels of government.
• New or modified approaches to development.
Watershed-Based Floodplain Management

- A **watershed**, commonly referred to as drainage basin or catchment, is an area of land that drains all streams and rainfall to a common point.

- Large watersheds, like the Mississippi River basin, contain thousands of smaller watersheds. Natural ridges are often the boundaries between watersheds.

- Managing flood risk based on watersheds helps communities understand and address how decisions may impact upstream or downstream areas.
The Challenge

Louisiana’s watersheds are not defined by political boundaries.
Platform for Change

“It’s harder. It requires more work. It’s politically risky, but it is the right thing to do.”

- Gov. John Bel Edwards
• In May, DOTD issued requests for qualifications to develop watershed models for the state’s 59 watersheds.

• The recently completed Amite River Basin model is an example.

• The state is collaborating with experts throughout the country to build world-class models.
• Eight watershed regions will coordinate modeling and planning activities throughout the state.

• The state is offering grant funding to build local technical capacity for watershed and floodplain management activities, with awards expected in January 2020.
$1.2 Billion in Mitigation Funds

Congressional Allocation in 2018
HUD Guidance Published Aug. 30, 2019
HUD Rules Overview
MITIGATION FUNDING

- All funds must be used for mitigation activities.
- Fifty percent of funding must benefit HUD-declared most impacted and distressed areas, or MIDs.
- HUD must approve the state’s Action Plan before funds are available.
- The Action Plan will describe the needs and proposed approach for the funds.
- Four public hearings will collect comments on the draft Action Plan.
- The draft Action Plan will be posted online for 45 days, beginning Sept. 26.
HUD Most Impacted or Distressed Areas

FEDERAL REQUIREMENTS

• MIDs include: East Baton Rouge, Livingston, Ascension, Tangipahoa, Ouachita, Lafayette, Vermilion, Acadia, Washington and St. Tammany parishes.

• About $607 million (50 percent of these funds) will be spent in or will benefit these areas.
Louisiana’s Draft Action Plan
Action Plan Overview

- Details the state’s approach for using the funds.
- Includes draft projects, data collection and modeling programs.
- Incentivizes policy measures to advance community resilience.
Draft Action Plan

- **$1.2 billion** in CDBG-MIT funds to reduce statewide flood risk.
- Invest in **mitigation activities** and improve development standards.
- **$145 million** for **watershed modeling**, monitoring and mapping.
- More than **$970 million** for **projects** and programs to benefit watershed regions and the state.
Draft Action Plan

DATA DRIVEN SOLUTIONS

• High-quality gauge network.
• Watershed models that empower local decision making.
• Impartial decisions based on science.

WATERSHED MODELING
### Draft Action Plan

#### DATA DRIVEN SOLUTIONS
- High-quality gauge network.
- Watershed models that empower local decision making.
- Impartial decisions based on science.

#### PROJECTS THAT REDUCE FLOOD RISK
- Enhanced natural retention and local drainage functions.
- Focus on helping to move people out of harm’s way.

#### FLOOD CONTROL PROJECTS

---

**LOUISIANA WATERSHED INITIATIVE**

**WORKING TOGETHER FOR SUSTAINABILITY AND RESILIENCE**
Draft Action Plan

**DATA DRIVEN SOLUTIONS**

- High-quality gauge network.
- Watershed models that empower local decision making.
- Impartial decisions based on science.

**WATERSHED MODELING**

**PROJECTS THAT REDUCE FLOOD RISK**

- Enhanced natural retention and local drainage functions.
- Focus on helping to move people out of harm’s way.

**FLOOD CONTROL PROJECTS**

**COLLABORATION IS KEY**

- Regional watershed management that empowers collaboration between stakeholders and decision makers.
- Building better to mitigate the next disaster’s impact.

**REGIONAL PROGRAMS**
Feedback and Input
Public Hearing Schedule

**LAFAYETTE**
1 p.m. Thursday, Sept. 19
City-Parish Council Auditorium
Lafayette Consolidated Government
705 W. University Ave.
Lafayette, LA 70506

**WEST MONROE**
1:30 p.m. Thursday, Oct. 24
Ouachita Parish Emergency Operations Center
Fire Department Training Center
1000 New Natchitoches Road
West Monroe, LA 71292

**BATON ROUGE**
1:30 p.m. Wednesday, Sept. 25
House Committee Room 5
Louisiana State Capitol
900 N. Third St.
Baton Rouge, LA 70802

**MANDEVILLE**
6 p.m. Tuesday, Oct. 29
Council Chambers, Building A
St. Tammany Parish Government Administrative Complex
21490 Koop Drive
Mandeville, LA 70471
